SUMMARY

Software and product engineer with experience across the full product lifecycle. I've shipped ticketing platforms serving millions of users, built AI-driven products for national government clients, and owned internal tools end to end. Used to partnering directly with clients and working across product, design, and engineering to turn business goals into shipped products.

EXPERIENCE

Software Engineer

webook.com

December 2024 - Present, Riyadh, Saudi Arabia

- Build and ship features across multiple high-traffic ticketing platforms (webook.com, Alawwal Park, Ittihad Football Club, F1 STC Saudi Arabian Grand Prix, and SFA Domes), serving millions of users daily.
- Lead implementation of high-traffic web features using React and Next.js.
- Partner with Product Managers and stakeholders to scope features, write user stories, and prioritize releases based on business impact and technical feasibility.
- Track post-launch metrics and iterate on shipped features to improve performance and user experience.
- Helped build AI-powered search and automation features, coordinating across product, engineering, and platform teams.

Software Engineering Consultant

Beyond Company | Main Clients: SDAIA, SIDF

August 2023 - December 2024, Riyadh, Saudi Arabia

- Worked as a product and tech partner for government clients at the national level, aligning business objectives with technical delivery alongside stakeholders.
- Built the National AI Observatory for SDAIA, an internal platform that tracks AI progress, talent, and products across countries.
- Contributed to Saudi Arabia's National AI Ethics Principles, published by SDAIA, and the AI Ethics Assessment Framework used by the National Data Management Office (NDMO).
- Defined product vision, scoped functional requirements, and managed delivery timelines across multiple concurrent initiatives, coordinating across policy, design, and engineering teams.
- Led projects from concept and prototyping through to delivery and client handoff.

Software Engineer

NTG Clarity

March 2023 - August 2023, Riyadh, Saudi Arabia

- Owned the full product development of the NTG HRM mobile app, an internal HR tool adopted by 200+ employees across the organization.
- Defined requirements and technical specs in coordination with backend and frontend teams, and managed delivery milestones from kickoff to release.
- Supported cross-platform product development using React Native, Firebase, and Spring Boot.

Software Engineering Intern

Uzability Design Studio

June 2021 - September 2021, Riyadh, Saudi Arabia

- Collaborated with designers and developers to ship the company's website from concept to launch.
- Early exposure to UX workflows, client feedback loops, and iterative delivery.

EDUCATION

Bachelor of Engineering in Computer Engineering (High Honors Graduate)

Istanbul Bilgi University • Istanbul, Turkey

CERTIFICATIONS

Associate Cloud Engineer

Google Cloud • 2026

Cloud Digital Leader

Google Cloud • 2024

AWS Certified Cloud Practitioner

Amazon Web Services • 2023

SKILLS

- **Product & Delivery:** Requirements gathering, user stories, acceptance criteria, roadmap planning, release prioritization, client and stakeholder management
 - **Technical:** React, Next.js, React Native, Firebase, Spring Boot, REST APIs, AI/LLM integrations, RAG pipelines
 - **Cloud & Infrastructure:** AWS, GCP, Docker, Kubernetes, CI/CD (GitHub Actions)
-
